Job Roles in Information Technology.

This workshop is designed for individuals who want to understand more about the broad field known as Information Technology (IT), the career paths and associated job roles within IT, and how one can prepare for a career in Information Technology.

Since our inception in January 2002, Training Concepts has established a reputation as one of the leading IT solution providers in South Carolina through technical training and network integration. Training Concepts is recognized within the IT industry as an organization with high-quality delivery standards offering a full range of learning solutions for Networking and Operating Systems, PC Desktop Applications, Project Management, and Business Skills.
